ABSTRACT OF THE DISCLOSURE

SYSTEM AND METHOD FOR CUSTOMIZING AN  
INTERACTIVE TRAINING SEQUENCE

The present invention provides an improved system and method for customizing an interactive training sequence. The present invention includes one or more sets of predefined questions for gathering predefined information of the user, a customization module for customizing the training sequence responsive to the user response to the set of predefined questions, one or more login identifications for uniquely linking the custom training sequence to the user, a training module for playing the custom training sequence in a user understandable format when selected by the user. The custom training sequence is stored as a plurality of digital files, and each digital file is designated by a Uniform Resource Locator.

~~The customization system and method of the invention further provide an interactive product service manual that includes a documentation module for displaying documents of said manual in a user understandable format responsive to user selection, a simulator module for playing at least one interactive animated simulation in a user understandable format responsive to user selection, a customization module for customizing an interactive training sequence responsive to a user response to a set of predefined questions, and a training module for playing said customized interactive training sequence in a user understandable format responsive to user selection.~~
